Subject: OAG query

*2012 data extract*

Here's the main query we ran last year:

```
select char(dpsp_person_id) || '|' ||  
  char(value(dpsp_last_nme,''),40) || '|' ||  
  char(value(dpsp_first_nme,''),40) || '|' ||  
  char(value(dpsp_middle_nme,''),40) || '|' ||  
  char(value(substr(dpsp_ssno,6,4),''),4) || '|' ||  
  char(dpsp_dob) || '|' ||  
  char(value(dpsp_race,''),1) || '|' ||  
  char(irec_doc_nbr) || '|' ||  
  char(value(dmdt_strt_addr_1,''),35) || '|' ||  
  char(value(dmdt_strt_addr_2,''),35) || '|' ||  
  char(value(dmdt_city,''),35) || '|' ||  
  char(value(dmdt_state,''),2) || '|' ||  
  char(value(dmdt_zip_cde,''),16) || '|' ||  
  char(value(dmdt_county,''),3) || '|' ||  
  char(value(dmdt_country,''),2)  
from dlnldf.dps_person  
  ,dlnldf.issuance_record  
  ,dlnldf.demographic_detail  
where dpsp_person_id = irec_person_id  
and dpsp_person_id = dmdt_person_id  
and dpsp_designation is null  
with ur  
;
```

Thanks,
